## (5) **SPECIAL CONTINGENCIES**:

Convert tank 5 to Diesel. Remove islands and install new Bravo UDC. 3' of partial piping to accommodate new UDC New shear valves and flex connectors. This will correct several of the NOV violations. Install U bollards for collision protection.

Install new tank sump on tank 5 along with the ball valve and flex connector.

Install new spill container and drop tube on tank 7 RUL.

Amendment Reason: Upon testing the line we found a bad flex at the STP. We have to add a containment sump inorder to replace the flex.
