(5) SPECIAL CONTINGENCIES:

Amendment Reason: Leak detectors at this site are Incon TS-LLD which wire directly into the submergible pump wires and does not use communication wires. The leak detectors we sold with the new system require a communication cable ran from the tank monitor to the leak detectors. The site does not have a low voltage conduit running to the submergible tank sumps. After speaking with the customer about options thay have opted for us to install the new tank monitoring system, onstall mechanical leak detectors instead of the Electronic leak detectors due to site would have to be excavated in order to get conduits ran and wires pulled.
