Permit for INSTALLATION of Underground Storage Tank(s) and Piping for Petroleum and Hazardous Substances

Permission to install underground storage tank(s) or piping is hereby granted. Such installation must be in complete accordance with acceptable materials as specified in the Federal Register, Part II Environmental Protection Agency, 40 CFR Parts 280 and 281, and also with all sections of 41 Illinois Administrative Code, Parts 174, 175 and 176. The contractor the permit was issued to shall establish a date and time certain to perform the UST activity by scheduling the permitted activity through their UST contractor portal account. All testing forms must be submitted prior to the final being conducted. The tank owner must submit a Notification for Underground Storage Tanks form prior to the scheduling of the final schedule at: <https://webapps.sfm.illinois.gov/USTPortal/NotificationForm>.

THIS PERMIT IS VALID FOR SIX MONTHS FROM THE APPROVAL DATE.

General Requirements

USTs shall be installed to safeguard against movement by anchoring in accordance with manufacturer's instructions.

There shall be a minimum of two manufactured slotted or perforated observation wells of at least 4 inches in diameter, installed in each new tank field of tanks larger than 1000 gallons and one well for tanks less than 1000 gallons. A water tight containment shall be installed under all dispensers and at submersible pumps. A hydrostatic test must be performed on all containments. All steel piping for vents, risers, and fills in contact with the ground, backfill, or water shall be dielectrically wrapped or coated. A positive shut off valve shall be installed on pressurized product lines, at the submersibles, or installed at the tank for all suction piping systems. Vent piping is required to be tested from tank to grade level. All steel flex connectors in contact with ground, backfill or water shall have corrosion protection.

Summary of Work

Installing 1 - 10,000 gallon Glasteel II and 1 - 10,000 gallon Glasteel II tank, 2 compartment, 6,000/4,000 split. Veeder Root 450 Plus with DPLLD, CSLD and non-discriminating sump sensors. Interstitila sensors in both tanks. Single wall dispenser and sumbersible sumps with non-discriminating sump sensors with positive shut down. 3 - Gilbarco 700S dispensers. OPW C15A double wall piping. 1 - 28'x 110' eight column canopy. Emergency stop switch at control station and one dipsenser. Speakers in dispensers. Pipe bollards for collision protection.

Special Contingencies

Replacement Reason:

This permit is replacing permit #00965-2023INS, which was issued to Pemco Services. All previous work was performed by them. As they are unable to complete the final, they asked if we could do it for them. Once this permit receives approval, we will schedule a final on the portal.

Revision Reason:

Changed ownership

Replacement Reason:

Cancelled Permit requires a new permit to complete the final
