Summary of Work

This will be a 2-phase project. The first phase will be installing new single wall under dispenser sumps at the 3 fueling points. The second phase is a tank pad replacement, which includes replacing the existing single wall spill container for the Premium tank with a double wall spill container. The existing spill container for the Regular tank is already double wall, which we will try to save during the concrete breakout.

AMENDMENT: Adding Tank 12 for UDC installation

Special Contingencies**Amendment Reason:**

I forgot to add Tank 12 to the permit for UDC installation since it will involve line and air testing
