**Summary of Work**

We propose to set a transition sump on the existing piping run and install all new fiberglass sumps. Run new APT D.W. pipe to all master dispensers. Schedule inspection, Run new electrical to all diesel islands, backfill, set ballards, pour concrete back, pull wires, set new dispensers, Purge and calibrate. Schedule final inspection.

**Special Contingencies**

**NOTES: Dispenser closest to the existing buidng shows the distance is 10', it is imperative that the full 10' is maintained, per section 175.450 f) 5) of our rules. All UDCs must have sensors with positive shut down installed if not already existing.**
