Permit for INSTALLATION of Underground Storage Tank(s) and Piping for Petroleum and Hazardous Substances

Permission to install underground storage tank(s) or piping is hereby granted. Such installation must be in complete accordance with acceptable materials as specified in the Federal Register, Part II Environmental Protection Agency, 40 CFR Parts 280 and 281, and also with all sections of 41 Illinois Administrative Code, Parts 174, 175 and 176. The contractor the permit was issued to shall establish a date and time certain to perform the UST activity by scheduling the permitted activity through their UST contractor portal account. All testing forms must be submitted prior to the final being conducted. The tank owner must submit a Notification for Underground Storage Tanks form prior to the scheduling of the final schedule at: <https://webapps.sfm.illinois.gov/USTPortal/NotificationForm>.

THIS PERMIT IS VALID FOR SIX MONTHS FROM THE APPROVAL DATE.

General Requirements

USTs shall be installed to safeguard against movement by anchoring in accordance with manufacturer's instructions.

There shall be a minimum of two manufactured slotted or perforated observation wells of at least 4 inches in diameter, installed in each new tank field of tanks larger than 1000 gallons and one well for tanks less than 1000 gallons. A water tight containment shall be installed under all dispensers and at submersible pumps. A hydrostatic test must be performed on all containments. All steel piping for vents, risers, and fills in contact with the ground, backfill, or water shall be dielectrically wrapped or coated. A positive shut off valve shall be installed on pressurized product lines, at the submersibles, or installed at the tank for all suction piping systems. Vent piping is required to be tested from tank to grade level. All steel flex connectors in contact with ground, backfill or water shall have corrosion protection.

Summary of Work

Scope of Work: Installation of New Equipment: Install (1) **20,000**-gallon double-wall fiberglass gasoline UST. Install (1) 10,000-gallon double-wall fiberglass diesel UST. Install (1) 1,000-gallon Double-wall fiberglass waste oil UST. Install new double-wall fiberglass product piping with leak detection. Install spill containment sumps, sensors, and overfill protection. Install Veeder-Root TLS-450 Plus monitoring system. Install two (2) 12" diameter groundwater observation wells, 20' deep. Install emergency stop (E-Stop) system and remote overfill alarm. Install concrete fuel island (4' x 25' x 9") with four (4) bollards. Install canopy (30' x 30', 16' high, 6 LED lights) with footings. Install all required below and above-ground vent piping. Replace 100 sq yds of asphalt pavement.

Special Contingencies

Amendment Reason #1:

I made an error on the work description and listed the install of a 10,000 gallon gasoline UST when it should read a 20,000 gallon gasoline UST

Amendment Reason #2:

on the submitted site drawing I had the North arrow misplaced and mislabeled one of the USTs as a 10,000-gallon tank when it should have been a 20,000-gallon tank.
