Tanks on the Permit

Tank #	Product	Capacity	Tank Status	Regulated Status
13	Diesel Fuel	20,000	Currently in use	Federal
14	Diesel Fuel	20,000	Currently in use	Federal

Tank 13 Equipment

Equipment Type	Permit Equipment	
Piping	Fiberglass Double Wall Ameron Dualoy 3000/LCX	New

Tank 14 Equipment

Equipment Type	Permit Equipment	
Piping	Fiberglass Double Wall Ameron Dualoy 3000/LCX	New

Summary of Work

We will be adding a siphon system for the two diesel tanks. Saw cut one 5' x 20' area for a trench between the tanks for the siphon line. Demolition of concrete and disposal. Hydro excavate between the tanks to the tank top. Stockpile pea gravel onsite to be reused. Provide and install two (2) OPW extractor fittings with suction drops and risers. Provide and install Ameron fiberflass between the tanks. Provide and install red jacket functional elements, check valve and siphon tube. Provide and install copper tubeing from the existing submersible to the siphone line high point. Hydrostatic test tank sump with suction line. Perform primary and secondary line testing. Permorn tank tests to include new siphon line. Back fill using pea gravel. Dowel and pin the trench. Provide two (2) OPW 18" manholes for siphon risers. Pour concrete and finish.

Special Contingencies

NOTES: Sump sensors with positive shut down must be installed in both tank sumps if not already existing. Violations for tank 16 must be complied at the time of this permitted work.
