**General Requirements**

USTs shall be installed to safeguard against movement by anchoring in accordance with manufacturer's instructions. There shall be a minimum of two manufactured slotted or perforated observation wells of at least 4 inches in diameter, installed in each new tank field of tanks larger than 1000 gallons and one well for tanks less than 1000 gallons. A water tight containment shall be installed under all dispensers and at submersible pumps. A hydrostatic test must be performed on all containments. All steel piping for vents, risers, and fills in contact with the ground, backfill, or water shall be dielectrically wrapped or coated. A positive shut off valve shall be installed on pressurized product lines, at the submersibles, or installed at the tank for all suction piping systems. Vent piping is required to be tested from tank to grade level. All steel flex connectors in contact with ground, backfill or water shall have corrosion protection.

**Summary of Work**

We are Installing 3 20K DSL tanks along with pumps, piping and all required UST equipmet.  
We are also installing 8K GalsSteel tank for DEF

## Special Contingencies

### **Amendment Reason:**

THE MATERIAL WAS SUPPLIET BY THE CUSTOMER AND MADE A MISTAKE IN PIPING TYPE

### **Revision Reason:**

Changed tank sizes for tanks 13 and 14 to 10k apiece rather than 12k and 8k as originally permitted
