**(3) ABANDONMENT IN PLACE OF TANKS:**

- (a) *Number and size tanks being abandoned:* (TK # 7) - 10,000 gallons  
(b) *Location of tanks being abandoned:*

- (4) This permit is VOID if contamination is revealed during abandonment procedures or if tanks are not as indicated on your granted permit site plan. If contamination is revealed, this abandonment can continue only when the contaminated site section (2) of the certification on site condition has been submitted to our Office.
- (5) **SPECIAL CONTINGENCIES:** Tank is located near building, next to an existing underground gas main and water main. Also, removal equipment immobility factor comes into play because of limited maneuver space between freezer, fenced area, and building. Inspector must stress to contractor to send in two copies of the permit in the future, or the applications will be rejected.
- (6) **The owner must notify this Office when completion of tank abandonment has occurred, on the Notification for Underground Storage Tank Form. This form can be obtained at [www.state.il.us/osfm](http://www.state.il.us/osfm) or by calling (217)785-1020.**
