**(3) ABANDONMENT IN PLACE OF TANKS:**

- (a) Number and size tanks being abandoned:* (TK # 1) - 4,000 gallons
- (b) Product stored in each tank:* (TK # 1) - Diesel Fuel
- (c) Location of tanks being abandoned:* CONTAMINATED SITE! IEMA Number: 20130664
- (d) Location of piping being abandoned:* ***See contingencies section.***

- (4)** This permit is VOID if contamination is revealed during abandonment procedures or if tanks are not as indicated on your granted permit site plan. If contamination is revealed, this abandonment can continue only when the contaminated site section (2) of the certification on site condition has been submitted to our Office.
- (5) SPECIAL CONTINGENCIES:** **Tank lines will also be abandoned since they are running in the same piping trench as the active tank product lines per Brian Morin. Tank is to be filled with slurry mixture. The UST is located in a tank field with four other operational UST's. Removal of the UST would cause a loss of support for the remaining UST's and would result in an operational failure for the remaining UST systems. Site assessment and site assessment report form is on file.**
- (6)** The owner must notify this Office when completion of tank abandonment has occurred, on the Notification for Underground Storage Tank Form. This form can be obtained at [www.sfm.illinois.gov](http://www.sfm.illinois.gov) or by calling (217)785-1020.
