(5) SPECIAL CONTINGENCIES :

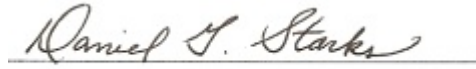

Veeder Root detected a pressure loss and shut down the RUL line. After investigating we discovered a bad SS Flex Connector inside the existing submerge pump sump on tank # 3
 We removed the old SS Flex Connector and replaced with a new one and related 2" steel fittings
 Small amount of gasoline was captured inside of sump. We pumped out and disposed of
 After the repair we ran a Veeder Rot .01 line test and it passed
 Owner will have a 3rd party independant test done.
