(3) **ABANDONMENT IN PLACE OF TANKS:**

- (a) *Number and size tanks being abandoned: (TK # 1) - 10,000*
  - (b) *Product stored in each tank: (TK # 1) - Gasoline - Regular*
  - (c) ***Location of tanks being abandoned: CONTAMINATED SITE! IEMA Number: 2019-1051 Tank #1 is located in the same tankhold as three operating USTs, between two pump islands and below two canopies. Removal of Tank #1 would jeopardize support to operating USTs, pump islands and dispensers, and canopies. As a result, Tank #1 should be abandoned in-place. Product lines supplying fuel from Tank #1 to both pump islands run adjacent to product lines from operating USTs. Therefore, product lines running from Tank #1 should also be abandoned.***
  - (d) *Location of piping being abandoned: Piping is located in a trench with active piping*
- (4) This permit is VOID if contamination is revealed during abandonment procedures or if tanks are not as indicated on your granted permit site plan. If contamination is revealed, this abandonment can continue only when the contaminated site section (2) of the certification on site condition has been submitted to our Office.
