This form can be obtained at www.sfm.illinois.gov or by calling (217)785-1020. After removal is completed, the owner/operator shall perform a site assessment by measuring for the presence of a release where contamination is most likely to be present at the UST site. This is in accordance with the Illinois Administrative Code 176.360 (a) regulations and 40 CFR Part 280.72 (a) Federal Register Requirement.

(5) SPECIAL CONTINGENCIES :

Remnants of a pre-1974 UST were discovered during excavation within the ROW near 620 S. Broadway. The operator thought it was scrap metal and lifted the already destroyed metal out of the ground. Work was immediately stopped.

Upon discovering that it may have been a historic UST, Enmarc was contacted to investigate. Enmarc confirmed that it appeared to be a UST and immediately contact OFSM Storage Tank Safety Specialist, John Brohan. He visited the site on 2/6/20 and after discussion with his management, advised that a permit for removal would be required.

Upon receipt of permit, the scrap metal will be decontaminated, as appropriate and properly disposed of. Soil from the excavation will be sampled accordingly and based on the sample profile, will be managed and disposed of based on test results.
