(5) <u>SPECIAL CONTINGENCIES</u>:

Existing dispensers to be removed. Single wall fiberglass dispenser sumps will be installed at the three locations noted on the plans. All other sumps will remain. Existing flexible piping will be brought into the new sumps. New flexible entry boots and shear valve will be installed with the new sumps. New Gilbarco Encore dispensers will be installed.

The spill bucket on tank #2 will be repaired and tested (the source of the fail seems to be a faulty fill cap). The overfill alarm will be repaired (appears to need a new light bulb). A third party testing company will be hired to test the sacrificial anode system and complete the annual leak detection certification.
