Permit for UPGRADE or REPAIR of Underground Storage Tank(s) and Piping for Petroleum and Hazardous Substances.

Permission to upgrade or repair underground storage tank(s) or piping is hereby granted. Such upgrade or repair must be in complete accordance with acceptable materials as specified in the Federal Register, Part II Environmental Protection Agency, 40 CFR Parts 280 and 281, and also with all sections of 41 Illinois Administrative Code, Parts 174, 175 and 176. The contractor the permit was issued to or an employee of that contractor (this does not include a subcontractor) shall submit a required job schedule for underground piping upgrade, leak detection, spill and overfill prevention of underground storage tank(s) to the Office of the State Fire Marshal, Division of Petroleum and Chemical Safety.

Both forms can be obtained at www.sfmillinois.gov or by calling (217)785-1020.

(5) <u>SPECIAL CONTINGENCIES</u> :

Amendment Reason: Due to being unable to remove the Ball Float Valves, it was necessary to breakout the Stage I Vapor Recovery. Because the overspill buckets were so close to the Stage I manholes, it was necessary to take those out as well. We installed new OPW Double-wall Overspill Buckets. We would like to amend the permit to include the installation of (4) Double-wall Overspill Containment.

Permitting to removed existing ball floats and install OPW over fill drop tube valves.

Also, replacing all single wall spill buckets with double-wall spill buckets.
