**(5) SPECIAL CONTINGENCIES :**

Dispenser 3 and 4 having a leak in the flex, we are changing the flex pipe .

We have to cut the fiberglass product line on both sides of the "T" inside the containment in order to replace the damaged flexi. The flexi and "T" is all one piece and is fused together to the product line which is why we have to cut the fiberglass line.

We did work on Pemum line earlier, now are doing the same for Regular line also.

Amendment Reason: Due to the last min leak found even in regular line
