Drop Tubes

Drop tubes ensure fuel is efficiently delivered at a faster rate and allow for submerged filling, generating less vapors and evaporation.

- Available in 2", 3" and 4" diameters and 10', 12' and 15' lengths.
- Drop tubes fit directly into the underground tank riser pipe in dual point vapor recovery and conventional non-vapor recovery fill systems.
- Drop tubes are furnished with a straight cut bottom, which can be cut to length on the job site.
- CARB EVR Phase 1 Certified (VR-101) models available.
- Biofuel compatible (E85 and Biodiesel) models available.
- For use with outside clamping drop elbows on adapter only. Do not use with inside expanding drop elbows.
