

Ameron - Dualoy Fuelhandling

Latest news

Product Compatibility

Ameron Dualoy 3000/L, 3000/LCX and 3000/MCX

Diesel exhaust fluid

All materials used in the manufacturing of Dualoy products have been determined to be Compatible by an Independent Third-Party Laboratory. Currently there are a number of successful DEF installations using Ameron pipe both above and below ground

Biodiesel

All components of Ameron Dualoy piping systems are suitable for use with "bio-diesel". While the term bio-diesel is not specific to an exact formulation of fuel, the chemical compatibility of the thermosetting epoxy resin systems used in the products is suitable for all types of fuels and fluids made from petrochemical and biological sources

E-85

Based on the testing performed at Underwriters Laboratories Inc., Northbrook, IL, and the criteria established for product use, all past and current Dualoy 3000/L products are documented to be Listed for ethanol blended gasoline which includes E-10, E-85 and 100% ethanol
