Red Thread IIA 100% Ethanol Compatibility

To whom it may concern,

This is to confirm the compatibility of the Red Thread IIA product line to 100% ethanol. Red Thread IIA pipe and adhesives are compatible with all ethanol fuels up to 100 percent concentration. Prior to 1988, UL-971 did not offer a listing for alcohol blended fuels, although legacy Red Thread products were compatible with ethanol and all concentrations of ethanol.

Respectfully yours,

Mrs. Lisa Blasingame
Fuel Handling Sales Manager – US and Canada
