RE: Fuel Compatibility

Where a 3rd Party Certification exists, Franklin Fueling Systems will always seek to secure that certification for the liquid being stored. Franklin Fueling Systems stands true to the policy that we submit all equipment to obtain the 3rd Party, nationally recognized certifications. However, after a product has been installed, it is beyond the ability of Franklin Fueling Systems to state the same characteristics and qualifications exist that are required to meet the standards set forth in the 3<sup>rd</sup> party approval. Unfortunately, at this time Franklin Fueling System cannot provide a compatibility statement for the equipment requested.

Fuel Type-**E-85**

Compatible equipment/models: **APT XP Piping XP-XXX-XX-XXX, APT Polyethene and Fiberglass Tank and Dispenser Sumps**
