

3/4" Black Steel Pipes

\$1.25

SEE TABS BELOW FOR MORE INFORMATION

AVAILABLE :

Description:

These pipes are 4 of the most common sizes used to build biodiesel processors & wash tanks with. Made from "Black Steel", they are sturdy, can hold up to pressure, and work great for use in both processors and wash tanks. They connect well to our other plumbing fittings and hold up well over time. And, unlike galvanized pipes, these pipes don't react with Biodiesel, Methanol, or the Catalysts used which means they'll help to produce great quality biodiesel.

Be sure to pick up some of our pipe tape to seal these pipes with.

See these in use in our assembled processors & wash tanks in our photo galleries section.

Suggested Uses

3" X 3/4" - Processor & wash tank inlets (non-standpipe) and throughout plumbing.

9" X 3/4" - Connecting ball valves to top of processor inlets.

12" X 3/4" - Connecting stand pipe, vent tube, wash tanks, and other plumbing.

9" X 3/4" X 4" Thread - Perfect for wash tank stand pipe!

9" X 1/2" (not shown) - Processor site tube connection.
