INTERSTITIAL HIGH ALCOHOL SENSOR FOR STEEL TANKS

Interstitial High Alcohol Sensor for Steel Tanks

The Interstitial Sensor for steel tanks with high alcohol product is made of stainless steel and detects the presence of liquid between the double walls of the tank.

Constructed of non-corrosive stainless steel for monitoring of steel tank interstitial in high alcohol alternative fluids such as E85. The sensor triggers visual and audible alarm to notify you immediately of any leaks, so you take quick and efficient action to help prevent safety and environmental issues. The console can also trigger an on-site alarm for even greater warning capability.

Key Features

- Constructed of non-corrosive stainless steel for monitoring of steel tank interstitial in high alcohol alternative fluids such as E85.
