# ACT-100-U

[REQUEST A QUOTE \(HTTPS://WWW.MODWELDCO.COM/QUOTE\)](https://www.modweldco.com/quote)

## Overview

ACT-100-U™: "Coated underground storage tank - A steel primary tank with a nonmetallic external coating of urethane resin." These are atmospheric steel tanks intended for storage underground of flammable and combustible liquids. Threaded fittings / openings can be located along the tank's top centerline or openings can be installed inside containment sumps. ACT-100-U tanks may be single or double wall construction, with or without multiple compartments for multiple fuel storage. If the tank is a double wall configuration, then it has interstitial monitoring capabilities. ACT-100-U tanks are built to Underwriters Laboratories UL-58, UL-1746 Part IV and Steel Tank Institute's ACT-100-U F-961 specifications.

## Features

- 300 to 60,000 gallon capacity
- Material of construction; carbon steel
- Underwriters Laboratories Construction, UL-58, UL-1746 Part IV
- Steel Tank Institute ACT-100- U construction compliance
- Single or double wall steel configurations available
- Available with multiple compartments for multiple fuel storage
- Compatible with gasoline, diesel, fuel oil, ethanol, methanol and additives
- Can be lined internally for special applications, such as jet fuel or potable water storage
- Installation friendly and lower installation cost
