

FLEXIBLE CONNECTORS

FLEX-ING® brand flexible connectors have become the industry standard and benchmark for quality as a means to easily connect a pipework system to other system components such as submersible pumps or shear valves. As an integral part of any system, installers enjoy how easy they make connections in tight spaces while station owners have come to depend on their durability and their simplification of regular maintenance. End fittings are available in either nickel plated steel or stainless steel construction. FLEX-ING® flexible connectors offer multiple diameter and length options as well as a wide offering of end fitting connections so you can create the right flexible connector to fit virtually any application.

HIGHLIGHTS

- Standard on all flexible connectors, the stainless steel corrugated fuel contact layers feature a thick construction and gain flexibility from having more corrugations per foot rather than thinner walls.
- Enclosing the corrugated fuel contact layer is a stainless steel braid that is manufactured from only high-grade stainless steel.
- Standard end fittings are nickel plated steel with stainless steel construction options available on any flexible connector that does not include a swivel end fitting.
- Available in a multitude of end connections to ensure the right fit for any application - including tees, elbows, and fiberglass transitions.
- All metal construction means one flexible connector for both above and below ground applications (may not be direct buried).
- Schedule 80 hex end fittings protect against deformation of the ends during installation.
- The EZ FIT union style coupling system is specifically designed to make connections in confined spaces simple and tight.
- EZ FIT union style couplings come complete with couplers and gaskets (flange only fittings excluded).

SPECIFICATIONS

- Meets USA NFPA 30-A fire code requirements.
- Outer shell: 304 stainless steel
- Inner core: 321 stainless steel
- End fittings: Nickel plated steel or stainless steel.
- 100% pressure tested to 100 PSI to assure quality.

Approvals/Certifications

- UL Only those fuels formulated in accordance with 40CFR80, "Regulation of Fuels and Fuel Additives," and meeting the following ASTM fuel specifications and blend limits:
 - Diesel with or without biodiesel blends up to 5% (B5)
 - Diesel with biodiesel blends between 6% - 20% (B6 - B20)
 - Gasoline with ethanol blends up to 10% (E10)
 - High-blend ethanol, with ethanol/gasoline blends from 51% to 83% (E51 - E83) commercially sold as E85 Diesel with or without biodiesel blends up to 5% (B5)
 - Mid-range ethanol, with ethanol/gasoline blends from 11% to 50% (E11 - E50)
- UL 2039 approved for 50 psi working pressure.

ORDERING INFORMATION

Use the diagrams below along with the Ordering Guide at the bottom to help you build your flexible connector model numbers.

Ordering Options Diagram

End Fitting Options

*These models feature full stainless steel construction.

Ordering Guide

Complete flexible connector part numbers have a specific order and are created using the following guidelines. Please note that full stainless steel models are available on any flexible connector that does not include swivel end fittings.

A B X C D X E

A = Product Type

FF = If either of the end connections are any type of swivel or EZ Fit, this option must be selected.

FFUL = If both end connections are fixed (non-swivel or EZ Fit), this option must be selected.

B = Hose Diameter

07 = ¾"

10 = 1"

15 = 1½"

20 = 2"

30 = 3"

40 = 4"

C = Overall Length in Inches

Use two-digit format

Examples:

FF20X18M346XHM = Flexible connector with swivel end fitting(s), 2" hose diameter, 18" overall length, with one male swivel end fitting and one fixed Hex male end fitting.

FF20X18SSEZMXSSHM = Flexible connector, 2" hose diameter, 18" overall length, with one stainless steel EZ Fit male end fitting and one stainless steel fixed hex male end fitting, full stainless steel construction.

Flexible Connectors with Differing Hose and End Fitting Diameters

All end fittings are, by default, the same diameter as the hose. If you require a flexible connector where the end fitting diameter does not match the hose diameter, the size must be indicated numerically in front of the corresponding fitting as in the following example.

Example: FFUL15X18HMX2HM = Flexible connector with fixed end fittings, 1½" hose diameter, 18" overall length, with one 1½" hex male fixed end fitting, and one 2" hex male fixed end fitting.

D & E = End Fitting Options (non-swivel options available in stainless steel)

EZ = EZ FIT flange only (stainless steel)

EZM = EZ FIT male NPT (**SSEZM** = stainless steel)

EZF = EZ FIT female NPT (**SSEZF** = stainless steel)

EZFG = EZ FIT fiberglass glue pipe (**SSEZFG** = stainless steel)

M346 = Male swivel NPT

F346 = Female swivel NPT

HM = Hex male fixed NPT (**SSHM** = stainless steel)

HF = Hex female fixed NPT (**SSHF** = stainless steel)

BT = Hex male fixed BSPT (**SSBT** = stainless steel)

BTS = Male swivel BSPT

MS90 = 90° with male swivel NPT

EZFFT = EZ Fit Tee (**SSEZFFT** = stainless steel)

SSFF = Flat faced round flange (stainless steel only)

SSRF = Raised faced round flange (stainless steel only)

Note: Each EZ FIT union style coupling comes complete with couplers and gaskets.

Rules:

- 1) End fitting diameters can not be smaller than hose diameters.
- 2) Only one hose fitting per flexible connector can be of a different diameter than the hose diameter.
- 3) End fitting diameter must only be one size larger than hose (1" hose could use 1½" fitting, 1½" hose could use 2" fitting, etc.).
- 4) EZ Fit end fittings are available in 1", 2", and 3" only.
- 5) Additional end fitting types are available.

FLEXIBLE CONNECTORS EZ FIT SYSTEM

By stocking just a few fittings and the right kind of FLEX-ING® brand flexible connectors, you can transform your inventory into a versatile offering that's ready to handle the real-world demands of contractors. The EZ FIT system can help reduce your inventory and ensure you have the right solution on-hand for any situation.

HIGHLIGHTS

How EZ FIT Connections Work

A variety of products come with integrated flange fitting options. These flanged fittings are mated together using a single EZ FIT clamp and gasket. These connections are watertight and allow easy connection during installation or fast reconnection for service and maintenance.

Step 1: Flanged components like fittings and flexible connectors can be connected using a single EZ FIT clamp and gasket.

Step 2: The EZ FIT gasket fits in between the two flanged components to create a watertight seal while the EZ FIT clamp unhinges around the components.

Step 3: Close the single-pin EZ FIT clamp around the flanged edges of both components and tighten the wing nut to seal them together.

Extra EZ FIT Connection

If you require an additional point of connection, choose an EZ FIT male connection (EZM) instead of the hex male (HM). This comes complete with the EZ FIT clamp, gasket, and threaded male connection pre-assembled on the flexible connector. This gives you an additional higher disconnection point that is closer to grade level, making it easier for technicians to access for maintenance. It also provides an another swivel point for easier installation.
