## Fuel Compatibility

| Sensor                                                                   | TSP-DDS,<br>FMP-DDS,<br>FMP-DDS-U | TSP-DTS,<br>FMP-DTS,<br>FMP-DTS-U | TSP-DMS | FMP-ULS,<br>TSP-ULS | FMP-UHS,<br>TSP-UHS | TSP-EIS, FMP-<br>EIS, FMP-EIS-U | FMP-HFS2 | TSP-DIS, FMP-<br>DIS, FMP-DIS-U | TSP-HIS, TSP-HIS-XL,<br>FMP-HIS, FMP-HIS-XL,<br>FMP-HIS-U, FMP-HIS-XL-U | FMP-CDS-U |
|--------------------------------------------------------------------------|-----------------------------------|-----------------------------------|---------|---------------------|---------------------|---------------------------------|----------|---------------------------------|-------------------------------------------------------------------------|-----------|
| Diesel with or without biodiesel<br>blends up to 5% (B5)                 | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | Yes       |
| Diesel with biodiesel blends between<br>6%- 20% (B6 - B20)               | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | Yes       |
| Diesel with biodiesel blends<br>between 97% - 100% (B99 - B100)          | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | Yes       |
| Gasoline with ethanol<br>blends up to 10% (E10)                          | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | -         |
| Mid-range ethanol/gasoline<br>blends of (E15-20)                         | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | -         |
| High-range ethanol/gasoline blends<br>(E51-83)- Commercially sold as E85 | Yes                               | Yes                               | Yes     | Yes                 | Yes                 | Yes                             | Yes      | Yes                             | Installed in Brine Solutiion                                            | -         |

Note: Extended exposures to the above listed fuels or vapors can lead to swelling of connector cables and potentially damage sensors to the point of inoperability.
