PRODUCT SHEET

Features & Benefits	Technical Specs
• UL-Listed for up to 85% Ethanol. • Prevents gasoline spills in prepay or card-lock systems utilizing OPW's unique No Pressure – No Flow Device. It cannot be opened until the pumping system is pressurized, and closes automatically when the pressure is removed. • Prevents consumer from jamming the nozzle in an open position – blocker on lever guard. • FlowLock™ allows nozzle to shut-off when falling out of a vehicle, and is tipped up, limiting spillage and unsafe conditions. • Cycle-tested and proven to last longer than 1 million cycles • Durable lever guard that won't scratch your customers' vehicles – made from Duratuff®. • New hold-open clip spring lasts longer then previous designs. • Easy to use – utilizing Accu-Stop® to-the-penny Flow Control Technology.

DESCRIPTION	FEATURES	APPLICATIONS
The durable construction of this hose resists deterioration from highly ethanol blended fuels such as E25, E85, ozone, sunlight and cracking. This hose supports blended fuels up to 85% ethanol. The one wire braid steel reinforcement provides a working pressure of 200 psi. These hose assemblies include crimped fittings that are built to withstand the rough treatment received at curb pump self-service stations, as well as industrial and construction use. *Call for additional lengths not offered above. 1 in. ID hose also available - please call for a quote.
